G* GRASS

The star in your cabinet

Even greater stability - 40kg or 70kg

The good feeling of quality workmanship comes from side stability, quality materials and the professional finish of the Grass Nova Pro drawer system.

Minimum installation width and straight inner sides

Gain in storage space: Straight inner sides allow for a much greater usable drawer space.

Synchronisation

Smooth running, synchronised and silent over the entire extension.

Minimal deflection

A sign of quality and sturdiness.

Best air cushioning

Long cushioning distance,
gentle closing with the
hygienic medium of air.

Absolute side stability

No additional lateral stabilizers
are necessary.

Airmatic - The clean, integrated shock absorber

Air, as the operating medium provides reliable cushioning, is environmentally friendly and ensures hygiene in the kitchen.

Variation and Flexibility

Individualise your drawer system. Spice containers, cutlery inserts, internal drawer fronts, side elements and hanging waste bins help customise your drawer system.
